Drones, simulators and ranges for state police

State police forces manage crowds, patrol cities and highways, and train thousands of constables in shooting and driving. Many police lines have little land for a firing range. Star INXS designs and builds drones, ranges and simulators in India that are built for this work.

IN SHORT

- Star INXS Solutions Pvt Ltd builds drones, shooting ranges and training simulators in India that suit state police forces.
- For events, the Tethered Surveillance UAV stays above a crowd for 18-24 hours on ground power, and for patrols the SAP Series quadcopters fly 40-45 minutes over 7-10 km.
- For firearms training, the indoor range gives 6-8 lanes per module over 25-100 m for 9 mm to 7.62 mm, with a bullet trap and no external danger zone.
- State police can purchase through GeM, tenders or direct orders, and a budgetary quote is sent within one business day.
