USE CASE · INDOOR SHOOTING RANGE

Indoor shooting range for police and CAPF

Police lines and CAPF camps are often inside towns, where there is no land for an outdoor range and its danger zone. An indoor range keeps every round inside a building, so firing practice can happen close to where people train and live, in any weather and on any shift.

IN SHORT

- An indoor shooting range contains every round inside the building, so it needs no external danger zone and can stand close to where people train and live.
- The Star INXS Indoor Shooting Range is a prefabricated, bullet-resistant steel-composite building, 25-100 m long with 6-8 lanes per module, for small arms from 9 mm to 7.62 mm.
- It runs 24/7 in all weather, with software-controlled lighting that has dawn, day, dusk and night profiles, and one operator runs it from the control room.
- A steel bullet trap with a deceleration chamber and dust collection stops and collects the rounds, and a HEPA-filtered exhaust clears lead and fumes.

WHAT TO SPECIFY

FIGURE	WHY IT MATTERS	INDOOR SHOOTING RANGE
Range length	Sets the practices you can fire	25-100 m, configured to the site
Lanes	Sets how many firers train at once	6-8 per module
Calibres	Must cover the weapons on issue	9 mm to 7.62 mm (pistol, carbine, rifle)
Operation	Training on every shift	24/7, all-weather; dawn, day, dusk and night profiles
Structure	Safety of people outside	Prefabricated, bullet-resistant steel-composite building on levelled concrete
Containment	No round may leave the range	Steel bullet trap with deceleration chamber and dust collection; no external danger zone
Firing bays	Separation between firers	Bullet-resistant glass partitions; standing, kneeling and prone

HOW A RANGE IS DELIVERED

1. **Survey.** We study your site, weapons and throughput.
2. **Design.** The range is engineered around them: length, number of modules, lanes and the target mix.
3. **Build and check.** The prefabricated range is built and checked in our own facility.
4. **Install.** The building goes up on a levelled concrete foundation at your site.
5. **Train the operators.** Your staff learn to run the range from the control room.

COMMON QUESTIONS

Who makes the indoor shooting range?
Star INXS Solutions Pvt Ltd. The Indoor Shooting Range is designed and built in India, and the company is certified to five ISO management-system standards.
