Systems for CRPF, BSF, ITBP and other CAPF

Central Armed Police Forces guard borders, hold camps in difficult country and train large numbers of personnel every year. They need drones that watch for hours, ranges that fit the land they have, and simulators that save ammunition. Star INXS builds all three in India. Star INXS customers include the Indian Army, Indian Navy, Indian Air Force, CRPF and BSF. The same systems suit ITBP, SSB, CISF and NSG units.

IN SHORT

- Star INXS Solutions Pvt Ltd builds surveillance drones, shooting ranges, pop-up targets and training simulators in India for Central Armed Police Forces.
- For border posts and camps, the Tethered Surveillance UAV watches for 18-24 hours on ground power and the Hybrid VTOL launches at 4,500-5,000 m above sea level.
- For training, a jungle lane range hides pop-up, slicing, moving and turning targets along a trail at 30-60 m, and the indoor range gives 6-8 lanes per module over 25-100 m.
- CAPF buyers can purchase through GeM, tenders, defence portals or direct orders, and a budgetary quote is sent within one business day.
